Education

-Master's degree: Currently coursing a master's degree in computer graphics in URJC, Madrid (2022-currently studying).

-Degree: Physics graduate in University of Barcelona, mention in fundamental physics. (2018-2022)

-IA introduction course: course on artificial intelligence in UBICS(Universitat de Barcelona's Institute of Complex Systems).

Internships

MSLab

2022 October- currently in. Doing master's thesis in differentiable simulation in computer graphics. Using **C++** and **python**.

ALBA Synchrotron

2021 October - 2022 April. Designing an electron beam simulation from a thermionic RF-gun. Working with *general particle tracer* **GPT**, python and **MADX**.

UBICS

2021 July - November. Working with large sets of bibliometric data with python and SCOPUS API.

Technical skills

Expertise in both **GNU+Linux** and **Windows**.

Programs & Scripting languages

-General Programming Languages: C & C++, Python, Fortran, C#

-Python ecosystem: Matplotlib, Numpy, Scipy, Sympy, Pandas, PyTorch

-Parallel programming: Cuda and (openMP).

-Writing: LaTeX, Markdown, Org Mode

-Graphics programming: OpenGL API, GLSL, HLSL.

Used to work with git version control system and github.

General skills

Languages

- Catalan (Native)
- Spanish (Native)
- English (C2 level awarded by Cambridge)
